Work experience

Qempo   Lima, Peru
Software Developer   2018 – 2020
This was my first job and I am grateful for my time there. With more than 200K users, Qempo is a shopping platform that allows people in South America to buy items only available in North America. I was part of a scrum team of 7 developers. I contributed to the shopping platform codebase but was responsible for the front-end development of the back-office app: speaking with end users (logistics team), writing the new requirement proposals and coding the web client from scratch. Some things I did were:
• Develop shopping platform with more than 200k users. The front-end stack consisted of React, Redux, react-router and RxJS.
• Be responsible for front-end development of back-office webapp that increased logistics efficiency by a 100%.

Education

McGill University   Montréal, Quebec
B.A. Computer Science.   2020 – Present

Certifications

freeCodeCamp
JavaScript Algorithms and Data Structures.   2018

Skills

Programming languages & databases
Proficient in: JavaScript, Java, C.
Familiar with: Python, C++.

Frameworks, libraries & other tools
Proficient in: React.JS, Redux.JS.
Familiar with: Vue, RxJS, Redux-observable, Node.JS.
Other tools: Unix, Git, Vim, Bash. LaTex.

Languages
English, French, Spanish.

Talks

South American Independence Wars: a brief overview   March 2021
Talk given at Riverview Study Centre, Montréal, Québec.

Interests

Philosophy, History, Soccer, Classical Guitar.
